Training Equipment

We use a variety of training tools. Each staff member has had extensive training on each tool and is highly skilled at using a tool in accordance with our policies. These tools are utilized to aid in communication with your dog. These tools are not intended to be abused or misused. We will go into detail regarding proper use of training tools. If you are sent home with any training tool it is your responsibility to inform the trainer if you are unsure or uncomfortable with using the tool. Common training tools used are the following: training treats, place cots, slip leads, remote collars, long line leash, pinch collars, dominant dog collars, muzzles, and clickers.

Aggressive Dogs

Aggression in dogs whether it is human aggression or dog aggression is not fixable. You must always manage a dog and training will significantly help your dog. But a dog with aggression in it's history is never to be trusted, especially in the same situations that caused a dog to react prior to training. Behavior modification is a long process and proper management is required.

By signing this you agree to and understand the Policies and Procedures put into place at Sit Now Stay Dog training.
